DETAILED ACTION

Allowable Subject Matter

1. Claims 10-37 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The Applicant canceled claims 1-9, and added a new claims 10-37, according to the "Response" received June 18, 2004, and presented arguments in favor of allowance of the newly added claims. The Applicant demonstrated to the Examiner's satisfaction that, with respect to the 35 U.S.C. 102(b) rejection of the claims 1-9, the subject matter of which has been transferred to the newly added claims, the primary reference of E. de Chambost (4,798,953) is not applicable to the Applicant's invention since E. de Chambost fails to disclose the existence of a transmitted beam detecting means for detecting a transmitted beam comprised of the charged particle beam penetrating through the sample when the sample is provided on the sample stage and is being irradiated by the charged particle beam.

With respect to the newly added independent claims 10 and 36, E. de Chambost, and any other prior art, fail to disclose, in addition to the accompanying features of the claims, a sample correction device comprising: a sample stage for supporting thereon a sample; a first charged particle beam lens barrel with a first transmitted beam detecting means for detecting a first transmitted beam comprised of the first charged particle beam penetrating through the sample when the sample is supported on the sample stage and is being irradiated by the first charged particle beam.

Therefore, the independent claims 10 and 36 are allowed. The dependent claims 11-35 and 37 are allowed by virtue of their dependence upon claims 10 and 36, respectively.
